Re: Flood Preparations – Phase 2 (UPDATED)

With regards to the elevators and the parkade, we are keeping one elevator closed for now as a precautionary measure. Although there is not an immediate threat of the parkade flooding the water levels have not receded back to normal to safely engage both elevators.

We hope you will understand that if we were to get a sudden torrential downpour, we could still have to evacuate the parkade at a moment's notice.

We ask for your patience in dealing with only one elevator for a bit longer until the water drops to a safer level.

Additional updates on the flood situation will be made available as more information comes to light and/or if river levels start to rise again. Thank you for your continued co-operation.

Regards,

Sunrex Management Ltd.
